

DG SET

with **STAINLESS STEEL
MULTISTAGE VERTICAL PUMP**

*the innovative
booster set*

THE INDUSTRY'S
**MOST
COMPACT**
PUMP SET

**BOOSTER SET
RANGE**

- up to 4 pumps
- up to 4 x 7,5 Kw
- up to 4 x 23 m³/h

large savings

- Transportation
- Installation
- Cost
- Day by day energy consumption
- Maintenance

**DG
FLOW**

YOUR WATER UNDER CONTROL

MOTORS High efficiency "IE2" motors
Three phase power supply

MATERIALS

- Pump components ➤ **Stainless steel**
Aisi 304
- Ball valves ➤ **Nikel plated brass**
- Check valves ➤ **Nikel plated brass**
- Baseplate ➤ **Steel**

INTEGRAL SENSORS

Sensors are integrated in the Patent Pending "TEEVALVE"
The only Low Losses Check Valve you can Inspect and Clean "In Situ"

- Pressure sensor 4-20 mA

- Flow Sensor (high sensitivity)
to avoid frequent starting and pressure fluctuation so common in variable speed system with "Pressure Sensor only" controller.

HIGH EFFICIENCY PUMP UNIT

Assembled on a patent pending steel frame

Designed, engineered and produced in ITALY 

MAINTENANCE

Inspection and maintenance operation just require frontal access

COMPACTNESS

Transport overall dimension and weight are reduced
